## Why Metadata Matters

**Richard Harrington, PMP**
Book & Course Author
Mylio Photos Product Team

# DESCRIPTION

This class is perfect for all experience levels.

Your digital files contain your family history, but how easy are the to find and share?  Metadata makes it easy to locate your most important photos, videos, and documents.  Plus if you embed rich details about your files, you ensure that future generations can find and enjoy them.

# AGENDA

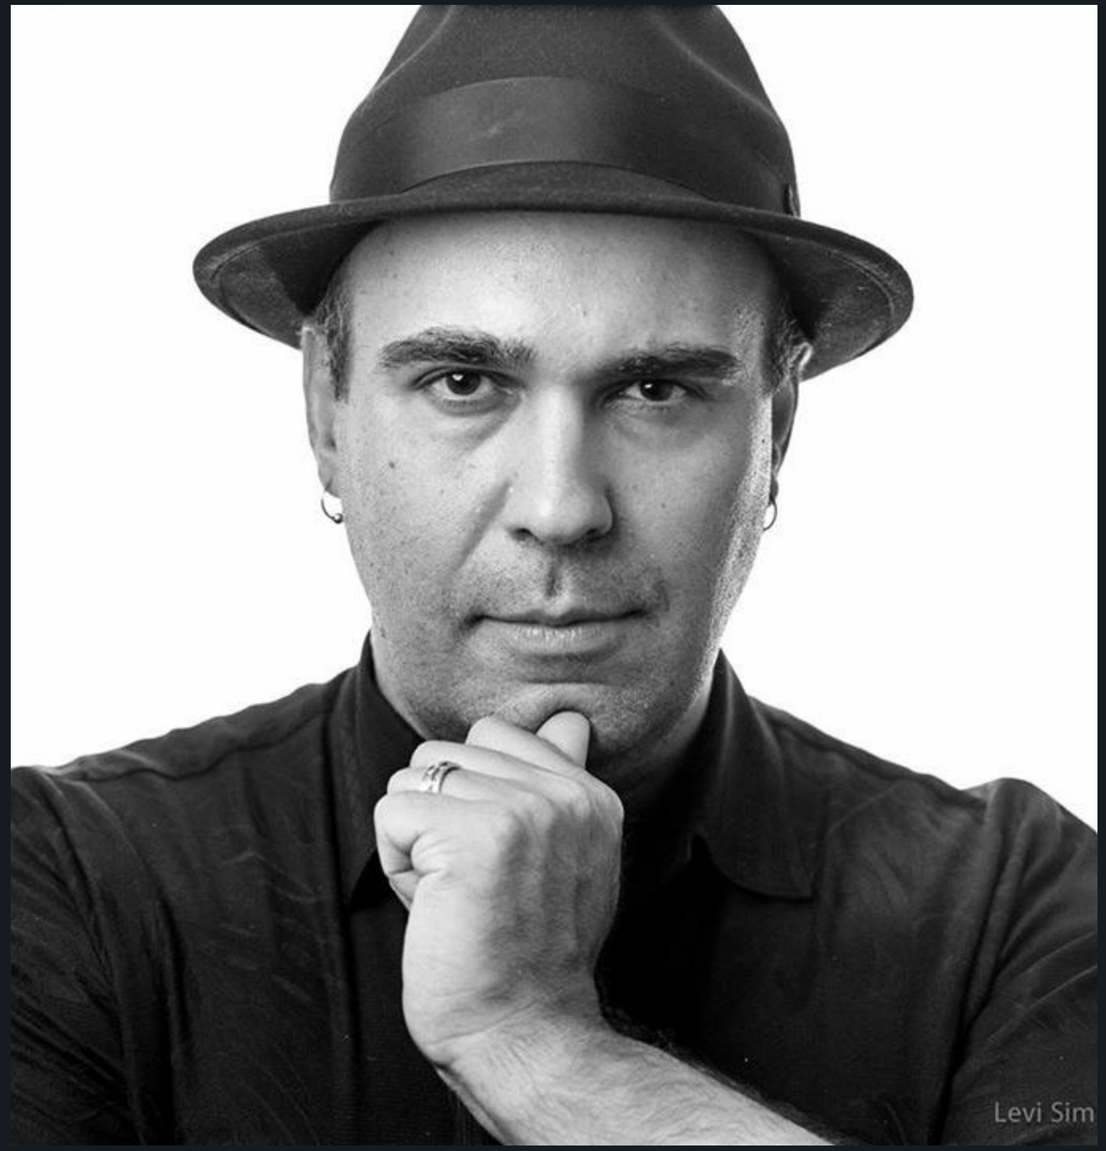
- Tag all of the people in your photos with an automated workflow
- Add location data to connect images to locations
- Assign meaningful dates to scanned materials to help organize them
- Search text in all document and even photos to find important details
- Embed this information directly into the files
- Work without the cloud to control costs and privacy

# RICHARD HARRINGTON

I'm a visual storyteller exploring
the fusion of photography and video

I help empower creativity with AI

I'm also a husband & father



# RICHARD HARRINGTON

- Product Lead for Mylio Photos
- Photographer
- Photo Educator
- Video Director
- Author 40+ Books
- Author 200+ Video Courses
- Consultant to Television Networks and Publications

PRESERVE IMAGES FOR
THE NEXT GENERATION

# FAMILY HISTORY

# ASSIGN MEANINGFUL DATES TO SCANNED MATERIALS TO HELP ORGANIZE

# FAMILY HISTORY

- Expanded support and control for essential metadata used by Family History websites and software tools with precise control over metadata
- All metadata meets the standards set by the **Family History Metadata Working Group**
- This ensures that files are more discoverable by future generations

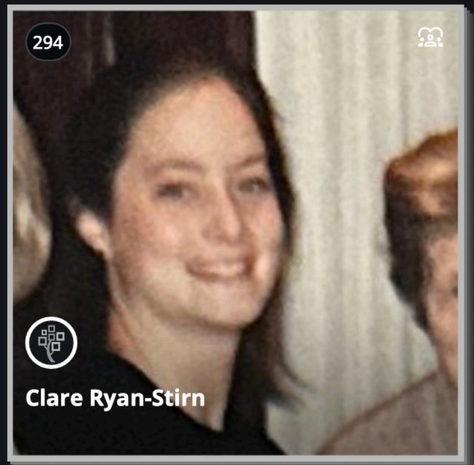
MT BARKER
NATIONAL PARK

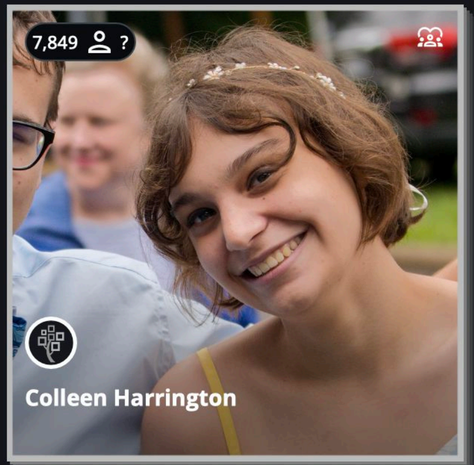
# FAMILY HISTORY

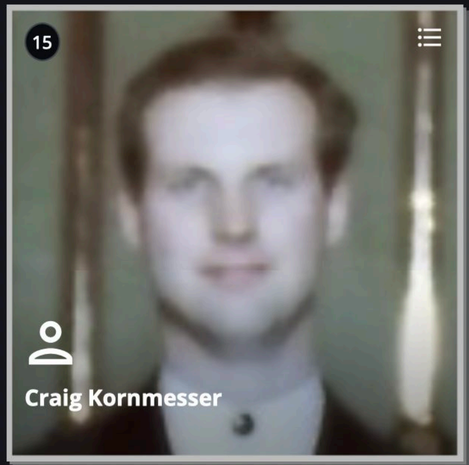
- By enabling the Family History Section, a user can precisely edit these metadata controls:
  - Date (including partial or fuzzy dates)
  - Title
  - Description
  - People Tagging
  - Geotagging
  - Location Shown

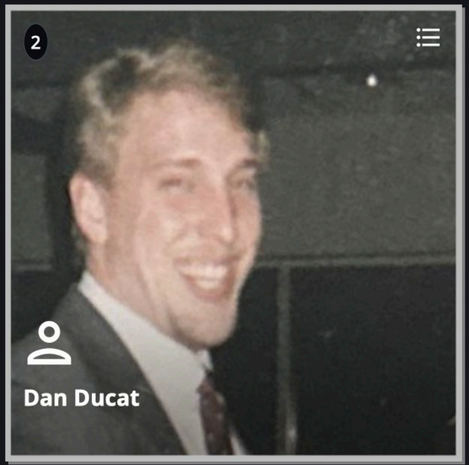
FIND ALL OF THE PEOPLE
IN YOUR PHOTOS

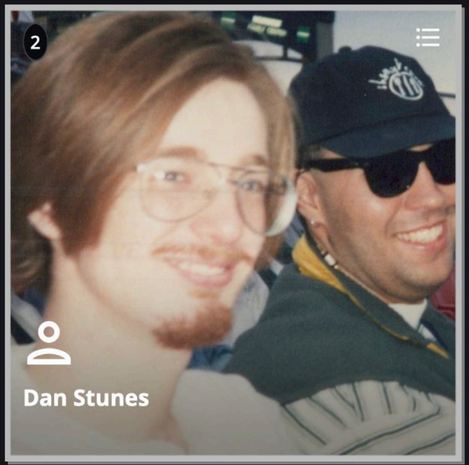
# FACE TAGS

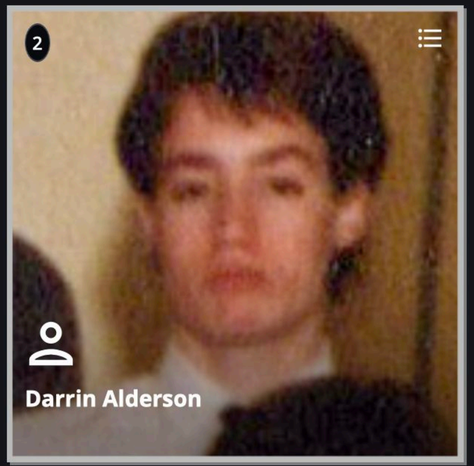


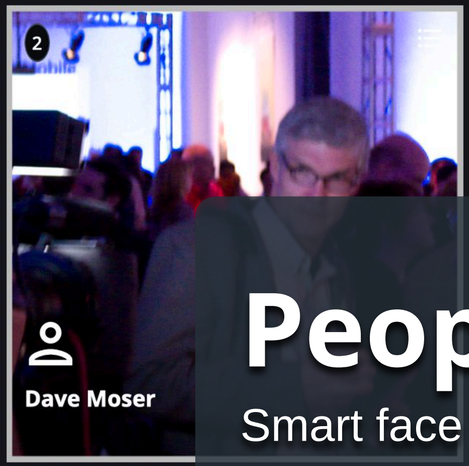


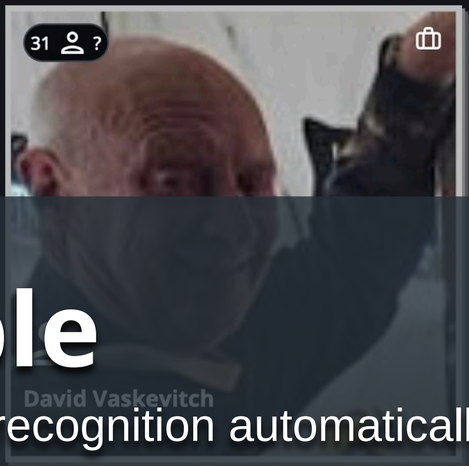


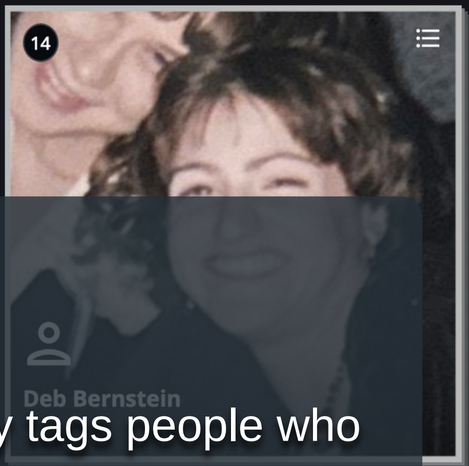


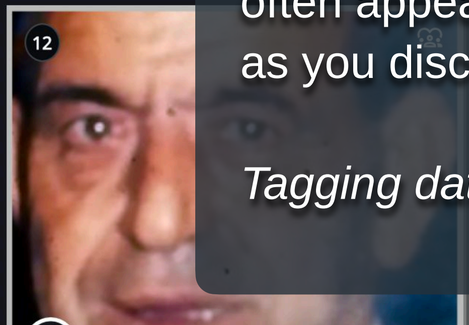












# People

Smart face recognition automatically tags people who often appear in your photos. Start tagging and watch as you discover pics you didn't realize you had.

*Tagging data is stored privately on your devices.*

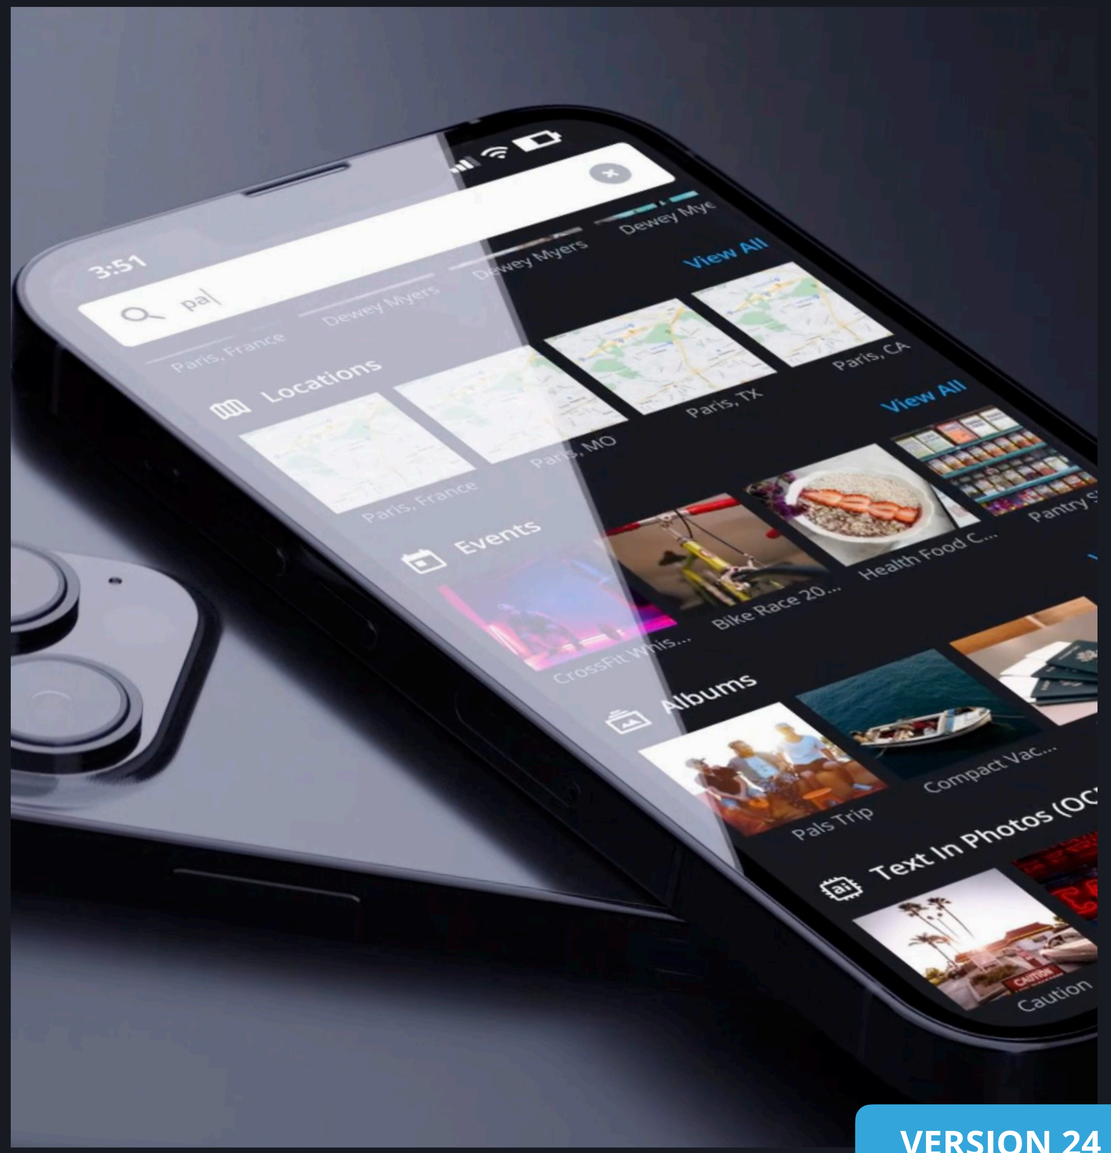
THE SMARTEST WAY TO
FIND THAT SPECIFIC FILE

# DYNAMIC SEARCH

# DYNAMIC SEARCH

- Upon import, Mylio Photos dynamically indexes the content of your files. The analysis happens directly on a user's devices, and no data about images is transferred to the Mylio company.
- All these details are added to a fast database that makes searching faster than any other tool on the market
- With a **Mylio Photos+** account, it is possible to add multiple devices, including phones, tablets, and computers.  Additionally, Linked folders allow for connecting multiple hard drives into an account.
- All of these are indexed into a single searchable database.

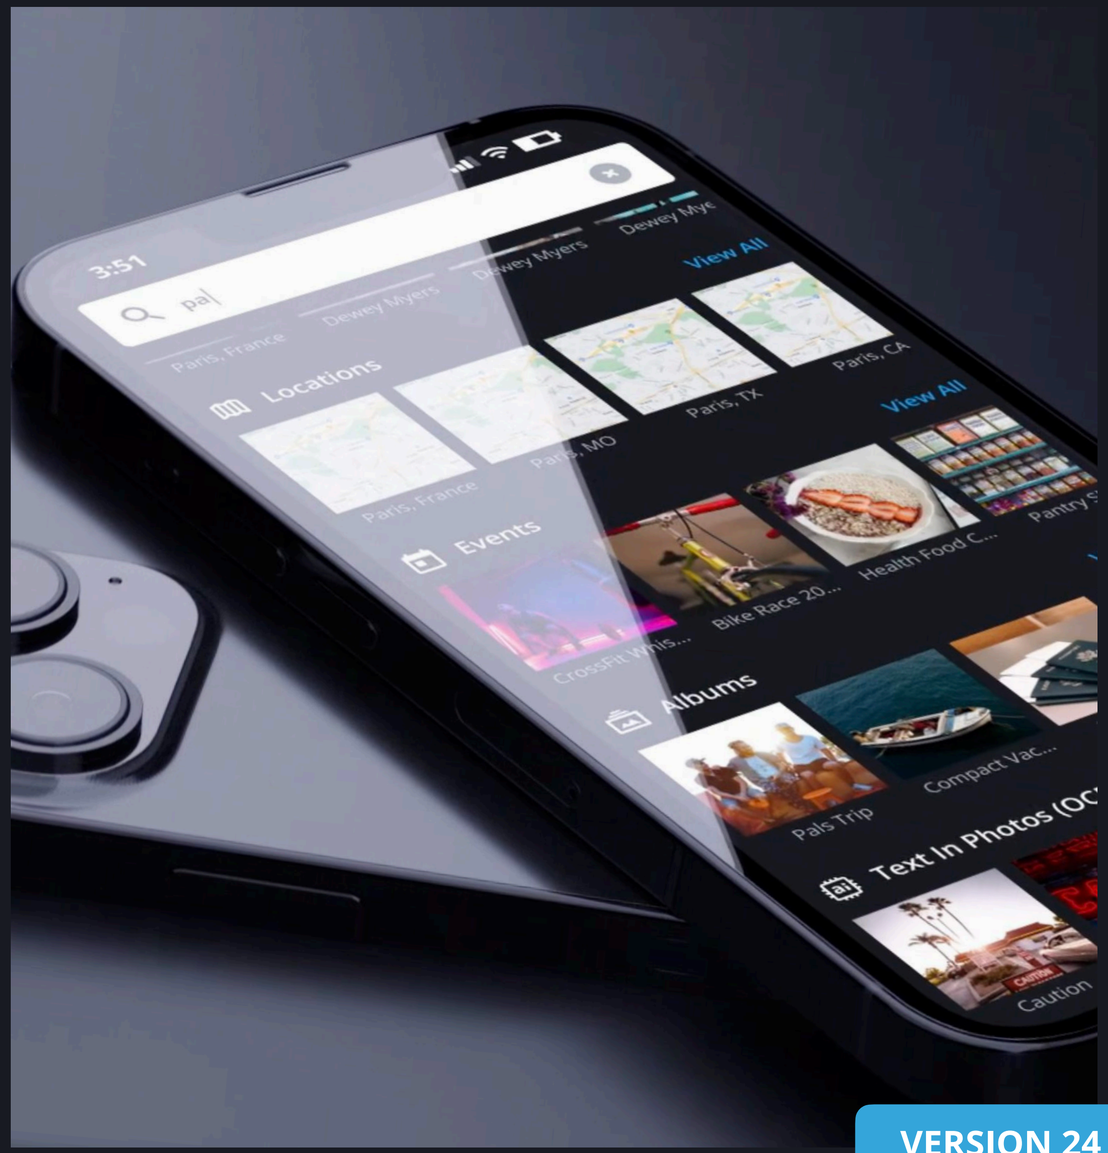


VERSION 24

# DYNAMIC SEARCH

The following areas are dynamically scanned and indexed:

- **AI SmartTags** make all photos searchable by recognizing over 1,000 activities, objects, and properties in photos.
- Text in the file with **Optical Character Recognition** (OCR)
- Faces in the image with **Face Detection** and suggested matching based on user input
- Photo properties from the camera's EXIF metadata
- Embedded and user-added **IPTC metadata**
- **GPS data** is indexed as well as reverse geocoded into human-readable addresses



VERSION 24

PUBLISH MEMORIES WITH EASE TO FAMILYSEARCH.ORG

# FAMILY SEARCH

# FAMILYSEARCH PUBLISHING

- Publish to **FamilySearch.org** allows you to post photos about their ancestors using the Memories option.
- This feature also connects it to individual people on the family tree
- Additionally, the content is entered into a permanent archive, ensuring that future generations who are related you can see the pictures and other media that have been posted
- You have the ability to self-curate your content and choose how you want to be remembered by your ancestors

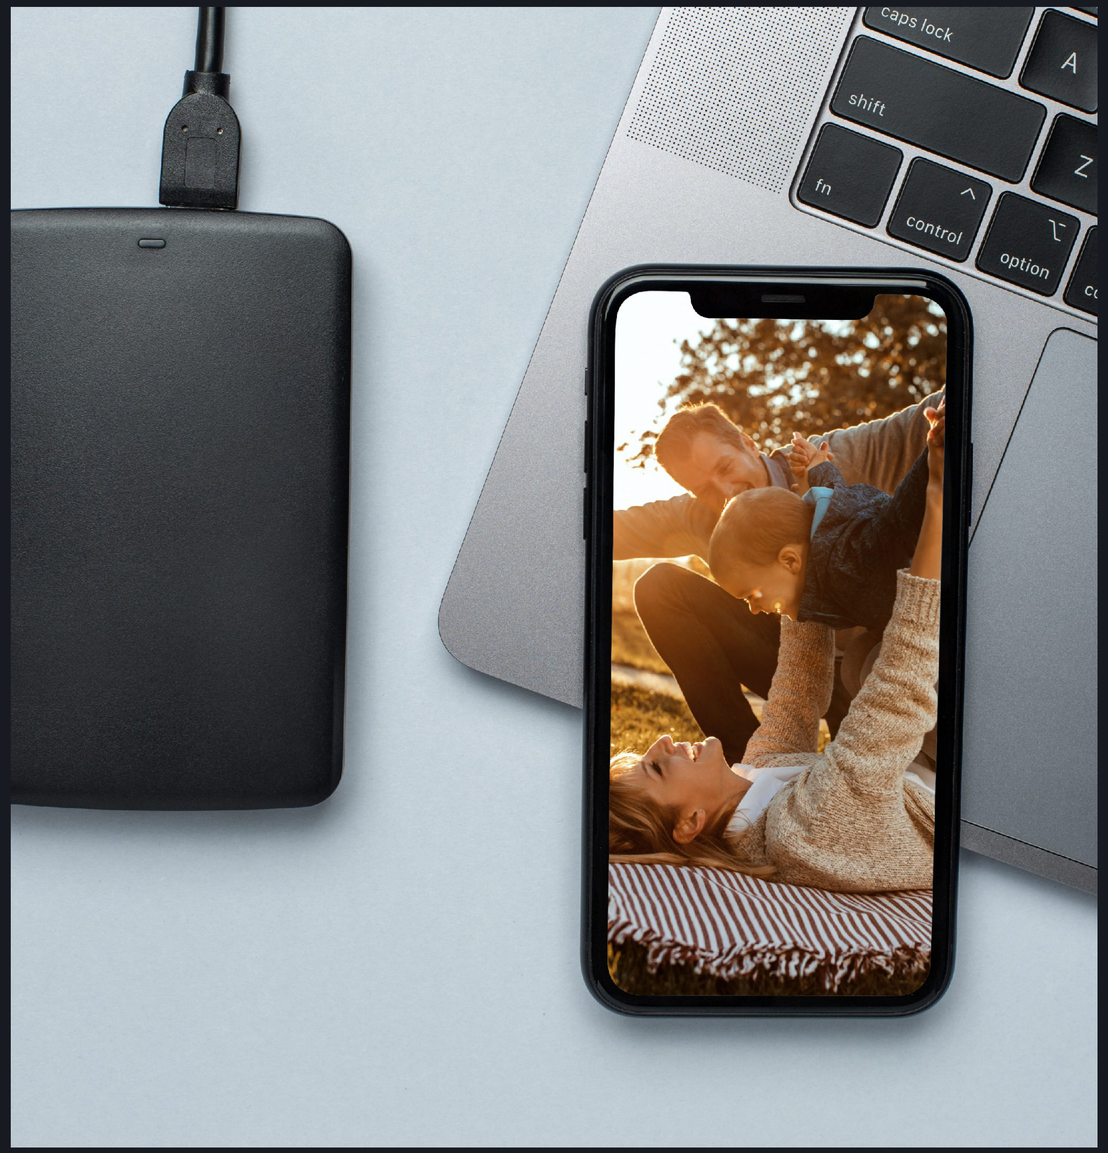
# PROTECTION AGAINST DISK FAILURE OR DEVICE LOSS

# PROTECT

- **Mylio Photos+** protects your most important memories from device failure or loss
- Store backup copies on your devices and backup drives to avoid ever-growing cloud data fees
- Mylio Photos can back up every photo from all linked devices to a home computer



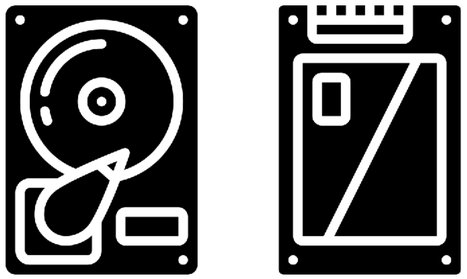
mylio photos+

# WHAT IS A BACKUP?

- A backup means you have a copy of all your important files. For many, this means your personal photos and videos as well as important documents and email.
- Instead of storing it all in one place (like your computer or smartphone), you should keep an extra copy (or two) of everything somewhere safe.

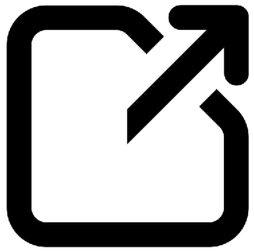
# 3 COPIES

CREATE ONE PRIMARY BACKUP AND TWO COPIES OF YOUR DATA



# 2 TYPES

SAVE YOUR BACKUPS TO TWO DIFFERENT TYPES OF MEDIA



# 1 OFF-SITE

KEEP AT LEAST ONE BACKUP FILE OFF-SITE

NEVER LOSE AN IMAGE

# PROTECTION VAULTS

mylio photos+

# PROTECTION VAULTS

- **Worry-Free Backup**
- Mylio Photos+ backup runs automatically on your computers
- Mobile devices import and sync in the background or when the app is running
- Easily check the status of all your files and devices in the Sync Panel

mylio photos+

VERSION 24.1

# VAULT

- Keep a complete copy of your library on a Vault
- Files are stored at full resolution
- Vault devices are ideal for backup and protection
- We recommend that all users have at least two Vault devices to protect against device failure or loss

## Add a Protection Vault

### What is a Protection Vault?

A Protection Vault is a device that contains your entire photo library. It includes the full-resolution original files and your Mylio Photos catalog. A Protection Vault protects you from device loss, theft, or failure.
