

Create a StoriedBook™ in 5 Steps

A Simple Guide to Turning Memories into a Masterpiece

01 

Start a New Project & Choose a Template

From the left side navigation, find StoriedBook™ Studio and select Start a Project. There are four templates to help you start your book project - Memorial, Recipe, Life Story, or Start from Scratch. Choose your project type.

02 

Set Up Your Project

Give your project a name. This is your book title, and you can always change it. To continue, a project name is all that is needed, but you can make other customizations if you want. Change the book color or add a photo.

03 

Add Stories to Your Project

There are two ways to add stories to your project: +Add your first story or +Add Story. Both of these options allow you to: Tell a new story, Add from My Stories, or Add stories from My Groups. Simply check the stories you would like to add.

04 

Organize Your Stories

Once you've added stories, it's easy to organize them in any order you choose by dragging and dropping them.

05 

Review & Order

After you've added all your stories and organized them, it's time to review your book project. During this step, you can change your book title, add a subtitle, add a foreword, change the book color, and add a photo. From here, you'll do a book interior preview to make sure everything looks the way you want. Congratulations! You've just created a StoriedBook™!
